WOMEN TO THE RESCUE—WOUNDED IN A BRITISH NAVAL BOMBARD.

Carrying Packages in the Harling Fleet.

"United News" photo.

SHOULDERS FORT DOUGLAS.

These two photographs taken from opposite sides at a height of 10,000 feet, particularly illustrate the effect of construction shell fire from modern guns. From left of the picture is the fort, the first view shows Fort Douglas, now Fort B, where the French were first destroyed. The second shows the same fort from the other side, where the French, after an earlier "operation," entered the position. Note the very much wider the fort in the second picture. This was not by the French re-occupying themselves. The photographs are from aerial pictures by the French Army during, captured in "L'Espresso."
